

To CA Board of Directors

ABC's Report on CA Take-home Car Use in October, November and December 2009

As we had done last year, ABC obtained and analyzed the CA take-home car use for the last three months of 2009. We looked at the same three months we had analyzed last year. We are pleased to report that CA staff is doing an excellent job of keeping the logs for each vehicle. The logs are clear, easily understood and reasonably complete. We are also pleased to report that our analysis showed no excessive personal use of the cars. The CA staff is very responsible in their use of CA's take-home cars.

ABC is pleased to note that in 2009 there were two fewer take-home cars than in 2008. This has got to save the lien-payers some money. We do note that four of the seven cars we analyzed are driven less than nine thousand miles each year and wonder whether just reimbursing the users of each of these cars for use of his own personal car might not be more cost-effective.
